

# College Student

## Critical Thinking Certificates

**For MEMBERS only.**

Each of these courses was designed to teach practical methods to analyze and resolve key business and organizational issues - problems, decisions and projects. Learn these methods to **transition from an education environment**. Add this certificate to your job portfolio and give yourself a competitive advantage in the job market. *Each online course is SELF-PACED. You control how much time you devote to progressing through the course and may start and stop as you please.*

# SYSTEMATIC PROBLEM SOLVING

*Certificate <update available now>*

**Systematic Problem Solving** 6 hours, 3 modules

Critical Thinking – Problem Solving certificate.

This course includes Problem Inventory, Problem Solving, and Tracking Root Cause modules PLUS 7 supplementary articles in one package. Concept briefings prepare the learner to demonstrate understanding by answering targeted questions, one concept at a time. Feedback prepares learners for any needed follow-up question. Demonstration videos show concepts applied to a case study pulling together all conceptual details to reveal a clear big-picture overview of each thinking process. This course will enable you to explain the logic of

problem definition, cause analysis and tracking root cause to solve any problem in the work setting or out. In short, you can demonstrate you know how to apply these concepts to work problems.

**Systematic Problem Solving TEXT** detailed reference guide with explanations on how to do each step of the Problem Inventory, Problem Solving, and Tracking Root Cause processes, includes 17 supplementary articles.

**Interested? Contact us:** [BPI@critical-thinking.com](mailto:BPI@critical-thinking.com)
